

# **Dr. Brown's Adobe Photoshop CS3 Scripts**

## **CS3 scripts in this installation:**

- Dr. Brown's 1-2-3 Process
- Dr. Brown's Caption Maker
- Dr. Brown's Black and White
- Dr. Brown's Place-A-Matic
- Dr. Brown's Merge-A-Matic

## **CS3 Extended scripts in this installation:**

- Dr. Brown's Background Remover
- Dr. Brown's 1-2-3 Process
- Dr. Brown's Caption Maker
- Dr. Brown's Slide Show
- Dr. Brown's Stack-A-Matic
- Dr. Brown's Black and White
- Dr. Brown's Place-A-Matic
- Dr. Brown's Merge-A-Matic
- Dr Brown's Fit Video to Audio
- Dr. Brown's Interpret Footage

## **What's new in this 1.9.4 version?**

- Rounding errors have now been reduced in 1-2-3 Process.
- Color profiles will now export with super small JPEG files in 1-2-3 Process.
- Merge-A-Matic is back with support for multi-layered Photoshop files.
- Place-A-Matic files are named after the first image selected in Adobe Bridge.

## **Known Issues and features:**

- The Easy Installer will NOT work if CS2 and CS3 are both installed on your machine.
- These scripts will only work with the English version of Adobe Photoshop CS3.
- Adobe Photoshop CS3 must be installed in the default system location for the Easy Installer to work correctly.
- For nonstandard installations, use the manual installation instructions below.
- Some complex Actions can cause errors with 1-2-3 Process.
- All Action "Open" statements must be removed, or turned off, before running Actions in 1-2-3 Process. If the "Open" statements are left on, then all your processed images will remain open.
- Processing images from a shared network drive has been known to fail.
- Super small JPEG images will only export at 72 dpi, because it uses the Web Export Feature to process the images.
